- Long life with *reliable* performance through the life of the pump
- Quiet Technology– our *quietest* personal electric pump
- Mimics a multi-user *hospital pump waveform* in a personal pump
- *Portable* and *light*– motor weighs just one pound
- Designed for *daily use*

The Ameda Difference

Breast milk is precious and deserves protection; we strive to ensure that in everything we do. Each and every one of our highest quality breast pumps are designed to fit seamlessly with moms' lives. Our pumps have been used by top healthcare institutions and millions of mothers to provide the best nutrition for their babies.

Purity

Closed system. Proven barrier helps protect milk while keeping tubing dry and clean. No need to clean the tubing while milk stays safe.

Ease

Complete control of suction and speed to select her best levels for milk flow and comfort. More closely mimics her baby's nursing rhythm.

Rhythm

Smooth, rhythmic waveform creates a gentle sensation so pumping feels comfortable. Shown effective for establishing adequate milk production.

Comfort

Different breast flange sizes that fit all Ameda breast pumps and kits to help making pumping more comfortable and efficient.
